

ALSAMA Scent™
Professional Scent Solutions

Let Your Brand Breath

ABOUT

ALSAMA SCENT is a brand created by Alsama Company for Scent Solutions and Sterilization. We began our mission in 2018, and our goal is very simple; we want to improve your working environment and give your brand a unique identity.

We don't want to be known as an air freshening company because we are so much more. When we say we create ambiance, we mean we can create value for your business, and this added value will set you apart from the competition.

Our scents penetrate deep into the human body and produce remarkable experiences. We want to take your brand to the next level. This technique is much more than just distributing lovely scents into the air; it's about integrating all of your branding elements together with your target demographic and marketing strategies.

OUR SCENT SYSTEM

ALSAMA SCENT system built with high-quality components and advanced atomization technology. You can choose the appropriate time period for the diffusion to function 7/24 and set the optimal scent levels for the intended area using our simple programs.

Our system is suitable for Hotels, Banks, Hospitals, Gyms, Retails, Mosques, Companies, Showrooms, Villas, and any spaces that need to be luxurious and comfortable.

PRODUCT INFORMATION

Model	ALSAMA IS300
Material	Metal
Voltage	DC12V
Power	8W
Weight	2.5kg
Capacity	200ml
Size	W190*D90*H220mm
Color	Black / White
Area	300-500m ³
Installation	Lay flat/wall/Connect HVAC
Use	Touch screen /APP control

Circular screen
